# How to share content
with your students

The **Sharing Options** are the same, no matter from where you share.
There are several places from where you can share content:

1. From the back of the thumbnail from the search results

a. You've searched for content, and now you have the list of search results, sorted according to popularity in the Jigzi system.

b. When you find a JIG, playlist or resource that you want to share, click its thumbnail.

c. There are 3 buttons along the bottom of the back of the thumbnail. Click the **Share** icon.

2. From within the player of a JIG

a. Note: This applies only to the teacher player. Student players do not allow sharing.

b. Play the JIG that you want to share.

**c.** Within the player, click the JIG face to open the left-hand panel:

**d.** You will find the **Share** icon on the top of the left-hand panel.

3. From your JIG gallery, where you can see all the JIGs that you are working on or have published

a. Click **Create** along the top menu to open Jigzi Studio
b. Click **My JIGs**

c. You will see a **Share** icon at the bottom of each of your JIGs in your gallery. Click the **Share** icon.

4. From the post-publish options

a. Once you have published a JIG that you have created, you get an option to share it

b. Click **Share JIG**

Your JIG is live!

What do you want to do next?

**Share JIG**   **Create new JIG**   **Play JIG**

How to share a JIG with a code

👑 Available only to subscribers

1. Click the **Share** icon from one of the places where it is available:
    a. From the back of the thumbnail from the search results
    b. Within the left-hand panel of the player of the JIG
    c. In the post-publish screen, immediately after you have
       created a JIG and published it
    d. From your JIG gallery
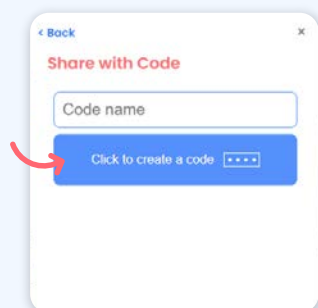

2. You will now see the **Sharing Options** popup.

Sharing Options

Choose JIG settings BEFORE sharing

→ ← JIG direction: **Left to right**
   Scoring & Assessment

👥 Share with code
Share to Google Classroom
Share to Microsoft Teams

🔗 Copy JIG link
</> Embed this JIG
💬 Share on social

3. Decide whether you want the JIG to play left-to-right or right-to-left by toggling the **JIG direction** option. The default setting should be the settings that the creator chose when they published the JIG, but you can over-ride these settings here. You can also decide whether you want scoring and the ability to track. If you do, make sure that the **Scoring & Assessment** is on (blue circle, not gray).
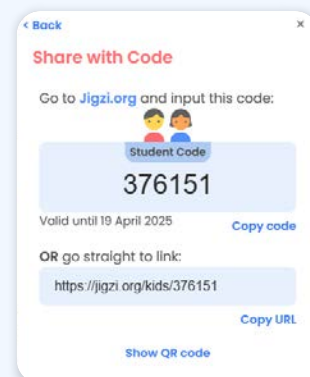

4. **Students will not need to register if you share using the student options.** If you want to share with your students so that they can play the lesson themselves, without having to register or sign up to Jigzi, then click **Share with code.** (Sharing to Google Classroom and to Microsoft Teams will also enable students to play the lesson without the need to register.)

5. Click **Share with code.** Another popup will display, asking you to **click to create a code.** Type in a name for the code too, so that you will be able to easily identify it later.

Click to create a code ····

6. The unique code that is created can now be shared with your students.

7. Click **Copy URL** to copy the URL. You could also click **Show QR code**, which would open a dialog with the code. Download and print the QR code to give your students.

# What the student does to play the JIG and be tracked

1. The student will click the URL that you shared, and will be taken directly to the JIG that you assigned. If you requested **Scoring & Assessment,** they will be asked to input their name.

Your name השם שלך

Type your name

✕ Clear

Play ▷

2. They will then complete the JIG, seeing their score accumulate as they progress. Once they are done, you will be able to check their progress.
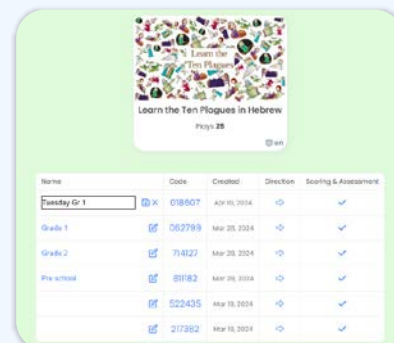

How to check your students' progress

1. On your Jigzi main screen, click your name on the top, right corner, and click **My classes** in the menu.

Sharon@gmail.com

⚉ My JIGs
📄 My playlists
💡 My resources
⚉ My classes

⚇ Profile
⚙ Account

Logout

2. Clicking **My classes** will take you to a screen where all the JIGs that you have assigned will be displayed. Click the JIG that you want to track.

3. You will see a list of codes that you have assigned for this JIG – you can assign different classes different codes. This is where naming your code comes in useful! You can edit the code names here too.

Learn the Ten Plagues in Hebrew
Plays 25

Name		Code	Created	Direction	Scoring & Assessment
Tuesday Gr 1	✕	018607	Apr 10, 2024	⇔	✓
Grade 1		062799	Mar 28, 2024	⇔	✓
Grade 2		714127	Mar 28, 2024	⇔	✓
Pre school		811182	Mar 28, 2024	⇔	✓
		522435	Mar 19, 2024	⇔	✓
		217382	Mar 13, 2024	⇔	✓

4. Click the code that you have just assigned. You will see a list of names of the students who have played this JIG.

Other options available here are to copy the code, URL or QR code to send to a student again, and the ability to export a CSV file of the scores to save as a spreadsheet.

5. Click a name to expand and see how that student has performed:

You will be able to see each scorable unit, what content was presented to the student, as well as how many tries they took to answer correctly. In the rightmost column, you will see the percentage that the student answered correctly.

How to open the Jigzi Kids' site:

1. The URL for the Jigzi Kids' site is www.jigzi.org/kids, but the easiest way for a child to reach it is to go to the Jigzi home page www.jigzi.org.

2. On the Jigzi home page, click **Student Code** along the top of the page.

3. The Jigzi Kids page opens up and the student can type in the code:
