

Build Your Own Online Siddur

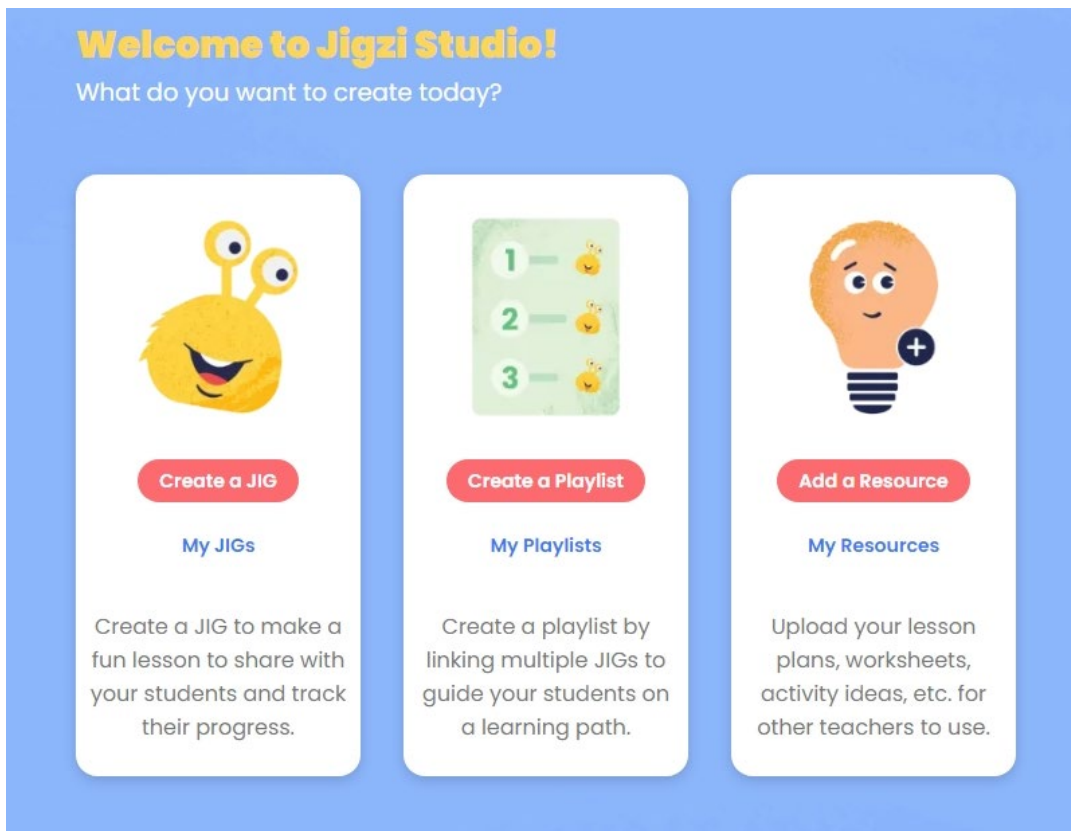

My Online Siddur is a handy series for children and parents to learn prayers / tefilot together. Each prayer is a separate JIG, and has voiceover, and if there is a tune for the prayer, we have included the song. We built this Siddur for a school in South Africa, so the accents and tunes are localized!

We built playlists for each grade, based on when the prayers are introduced by the school that we worked with in South Africa.

Would you like to build your own playlists for the grades at your school?

If the grade levels that we have created are not suitable for your school, create your own!

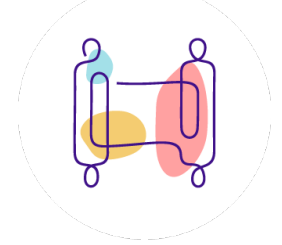

1. Simply go to Jigzi Studio (<https://jigzi.org/asset/edit/studio>) and click **Create a Playlist**.

Welcome to Jigzi Studio!
What do you want to create today?

- Create a JIG**
My JIGs
Create a JIG to make a fun lesson to share with your students and track their progress.
- Create a Playlist**
My Playlists
Create a playlist by linking multiple JIGs to guide your students on a learning path.
- Add a Resource**
My Resources
Upload your lesson plans, worksheets, activity ideas, etc. for other teachers to use.

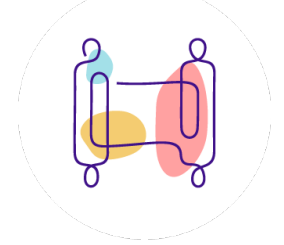

2. Name the playlist that you are creating: E.g. "Primrose Hill School's Online Siddur".

3. Search for 'Online Siddur' in the **Search** field on the right-hand side. You could also type in the name of the exact prayer that you are looking for.

4. Find the prayers that you want for this grade level and drag them into the panel on the left-hand side.

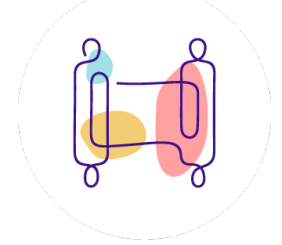

5. Build a **Cover** for this playlist. Click the topmost item on the left-hand panel that says 'Shalom Olam' and design your own cover. You can choose your own background and upload your school's logo. Add text so that it is very clear which grade this is for. Click **Continue** to preview the cover. When you are happy with the cover, click **Done**.

6. Your playlist on the left might look similar to this:

7. If you have added in all the prayers that you want to include, then you are ready to Publish. Click the last item in the panel: **Publish**.

8. Decide whether you want the playlist to be available to anyone (Public) or only available to people with the link (Private). Fill out all the fields in the dialog, select keywords so

that you can find it again, and click **Publish Playlist**.

9. You will then need to decide what to do next:

10. To **Share** with your students, make sure to **Share with students** – this will give a link to the playlist with the student player, and students will not be prompted to sign in.

Customization/Localization

Would you like to create the prayer voiceovers in your accent?

If you would like to change the voiceovers, please [contact us](#). You can supply the sound files, and we will build the new version with the sound files that you supply. There will be a minimal cost involved to build the JIGs with your sound files.

Would you like to add in your version of the song?

As with the voiceovers, please send us the sound files of your songs, and we will add them in to your customized siddur.
